Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-8, 12, 14, 17 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims variously recite "hyperdispersant", "active polymeric dispersant", "synergist agent" and "synergistically effective amounts".

"Hyperdispersant" is not defined in the specification. The examiner is unfamiliar with this term.

"Active polymeric dispersant" is not defined in the specification. It is not understood what applicants intend by % activity for their dispersants.

"Synergist agent" and "synergistically effective" are not so defined as to the effect or effects which applicants intend synergy to be operative on.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Whalen-Shaw.

Whalen-Shaw discloses aqueous mixtures of polymeric pigment dispersants, defoamers and ammonium hydroxide for adjusting pH.

Therefore the reference anticipates the rejected claims.

Claims 4, 5, 13, 18-20 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-11, 15, 16 and 23-25 are allowed.
